## **IMPACT Community Capital Signs United Nations' Principles for Responsible Investment**

IMPACT Community Capital, a leading impact investment manager investing in underserved communities and signatory to the United Nations-supported Principles for Responsible Investment (PRI), announced today that it affirmed its support by formally signing the PRI at the recent PRI in Person 2019 Conference in Paris. The PRI was developed by an international group of institutional investors reflecting the increasing relevance of environmental, social and corporate governance issues to investment practices.

“We are pleased to be signatories of the UN-supported PRI and to publicly acknowledge the principles it espouses,” said Jeff Brenner, President and Chief Executive Officer of IMPACT. “Becoming a signatory to the PRI is a natural extension of our 20-year history of our efforts to create systemic change through investments that deliver returns to our investors and make meaningful change in communities around the U.S.”
